

Dexterity II – Advanced Integration Techniques

Synopsis:

The Dexterity II – Advanced Integration Techniques course is designed to build upon the skills acquired from the Dexterity I – Product Fundamentals class. It will provide advanced knowledge necessary to build applications that are tightly integrated with Microsoft Great Plains. The class will focus on building integrations associated with maintenance windows, transaction windows, inquiry windows and reports. In addition, topics such as creating SQL data and upgrading applications will also be discussed.

By actively participating in this class, you should learn:

Advanced programming techniques used by Microsoft Business Solutions to develop Great Plains modules

How to develop add-on applications that will interact with Microsoft Great Plains products to meet specific customer requests

How to develop add-on applications that will "look and feel" like Microsoft Great Plains and provide a seamless interface between the applications to ensure a professional finished product

Who should attend?

General Prerequisites:

Dexterity I or 6 months experience using Dexterity.

Price: \$2,995 for 5 day course

Accepted Payment Methods: Check, Visa, MasterCard, American Express
